

# LinkScope Investigation Software

**LinkScope assists investigators** with discovering the context around data, and create intelligence maps which link together seemingly unrelated information.

**Our software uses** Natural Language Processing techniques to identify and extract important pieces of information from **over 100 different types** of documents, as well as from unstructured data.

**Through LinkScope, analysts** can make more informed decisions by streamlining the analysis process, enabling businesses to reach conclusions faster, and rapidly deliver value to their organization.

## Automate Analysis Processes

- Discover the risk exposure of the organization and its clients.
- Reveal interconnected entities and shared assets.
- Consolidate unstructured information.

## Import Data from Anywhere

- Represent any entity you want, from social media profiles to blockchain wallets.
- Integrate information from any source, both free and premium.
- Process files of almost any type, from PDF to image.

## Constantly Monitor Data

- Process new data as soon as it is made available.
- Automatically integrate updates into intelligence maps.
- Adjust monitoring scope dynamically to assist with investigations.

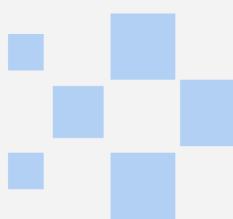

## Save Time and Money

- Reduce information processing time.
- Make more informed decisions, faster.
- Shrink workgroups of investigators to a single analyst with LinkScope.

## Tailor Made for You

- Custom capabilities to fit operational context.
- Deployed on Windows or Linux, On-Premise or on the Cloud.
- Scales seamlessly with the information workloads of your organization.

## LINKSCOPE CAN HELP WITH:

### CLIENT RISK MANAGEMENT

**LinkScope can help you** evaluate the risk profile of your clients. From monitoring the web for negative media to answering questions about your documents, LinkScope makes parsing information a breeze.

### IT & SECURITY OPERATIONS

**Our software assists with** performing and visualising on-demand network scanning, and can monitor your network for malicious activity. It can even monitor the entire internet (Darknet included) for any hackers talking about your organization, and keep track of your internet-facing assets!

### CRIME & COMPLIANCE

**Dig deep** into a web of transactions, or investigate the correlations between two seemingly unrelated entities: LinkScope allows for uncovering connections between data in just a few seconds.

### ...AND MUCH MORE!

**LinkScope's flexibility** allows for it to be customized to fit any data processing task. We can help you extract information from documents, databases, APIs and more, and present it in a human-friendly way to help you reach informed conclusions.
